

AUTOMATIC TRANSMISSION FLUSHING SYSTEM WOW! ATFS

**EXPAND YOUR SERVICE
PORTFOLIO WITH THE
WOW! ATFS**

**Environmentally friendly
transmission flushing
without additives**

With the Automatic Transmission Flushing System WOW! ATFS from WOW! Würth Online World, you can offer an additional service in your workshop when changing gear oil.

With the WOW! ATFS, you will not only expand your service portfolio in the workshop, but you will also benefit from additional return and turnover and even stronger customer loyalty.

Highlights WOW! ATFS

Art. No. W 080 000 001

- Robust, user-friendly and workshop-suitable mobile automatic transmission flushing device
- Two steel containers for old and new oil each with a volume of 20 liters
- Two high-performance filters (20 µm) clean the old and new oil during the flushing process
The old oil can be emptied easily and disposed of in the collecting system
- Residual oil can be removed from the oil sump without any additional devices
- Compressed-air driven, therefore no vulnerable electronics
- Was developed and approved together with Daimler AG
- The adapter case universal makes the ATFS compatible with 90 % of the vehicles of German manufacturers and many those of European manufacturers
- All information about the adapter case and the included adapters are available at www.wow-portal.com/flushingdevice

AUTOMATIC TRANSMISSION FLUSHING SYSTEM

WOW! ATFS

Benefits WOW! ATFS

Robust and workshop-suitable

Robust, user-friendly and workshop-suitable mobile automatic transmission flushing device for the demanding daily workshop routine.

More turnover in less time

Work efficiently by easily changing the automatic transmission oil and cleaning the transmission in the same work process.

Sustainable cleaning without additives

Gentle cleaning of the transmission without additives, using heat and a high flow rate.

One device for many manufacturers

In combination with the offered universal adapter case compatible with approx. 90 % of the vehicles of German manufacturers and many European manufacturers.

WHY IS TRANSMISSION FLUSHING IMPORTANT?

During a „normal“ oil change, up to 60 % of the old transmission oil remains in the vehicle. During transmission flushing, old oil is extracted and at the same time the transmission is flushed and cleaned of deposits and dirt.

- ✓ **Maintaining the value of the vehicle and preventing repairs.**
- ✓ **Immediate improvement of the shifting process**
- ✓ **Extended service life of the transmission**
- ✓ **Lower fuel consumption**
