WOW! POWER PACKAGE WSD 300 AND WTI 350

WOW!
Online World

FULL POWER WITH THE WOW! POWER PACKAGE WSD 300 AND WTI 350

- Full access to Power Repair - your fastest way to the repaired vehicle
- All diagnostic highlight functions of the WOW! software include

POWER REPAIR

WOW! POWER PACKAGE WSD 300 AND WTI 350

WOW! Diagnostic Power Package

consisting of:

- Software module WSD 300: Basic module for diagnostic function and vehicle data updates, new software functions, provides access to the advanced repair information of the highlight function POWER REPAIR
- Technical Data Combi Package WTI 350: for technical information and data for maintenance, inspection and service, engine, ABS, brake, comfort systems and much more, allows access to the technical data information of the Highlight function POWER REPAIR

The Snooper+ wireless diagnostic interface is required for functional diagnostics.

We recommend using the WOW! Diagnosis with one of three WOW! iQ systems.

More information on www.wow-portal.com or directly at your **WOW! contact person**.

Please be aware that the license packages are dependent on the respective distribution countries and are therefore not everywhere available. Please visit www.wow-portal.com/powerrepair and have a look which countries sell Power Repair.

WOW! Highlight functions

The right power for your daily workshop routine

- WOW! is tailor-made diagnostic software with a wide range of brands - exactly matching your workshop operation and your requirements and expandable at any time with technical data modules.
- Online updateable, within the contract period you will receive each update immediately upon availability.

WOW! POWER PACKAGE WSD 300 AND WTI 350

WOW! Diagnostic Highlight functions

Power Repair - the TOP WOW! function

You can't know everything, you just have to know where to find what you need. And as quickly as possible. Workshops should earn their money with customer service and not lose time in trouble-shooting. With POWER REPAIR you find the shortest way to the repaired vehicle.

- The fault codes are supplemented by targeted information.
- Just lean back while the WOW! software uses and compares different, modern data sources in real time.
- Thanks to almost unlimited vehicle data and fault code information, you'll find the way to the repaired vehicle faster and easier.

Full functional performance only with the WOW! POWER PACKAGE i.e. with active WSD 300 (basic module diagnosis) and WTI 350 (technical data information) license. Please be aware that the license packages are dependent on the respective distribution countries and are therefore not everywhere available. You can find more information regarding Power Repair on our website:

www.wow-portal.com/powerrepair

Flightrecorder

Diagnostic functions exactly for your time-consuming working day. With the WOW! FLIGHTRECORDER you can record mobile data during the test drive - without a co-driver. All you have to do is plug in the WOW! Diagnostic Interface Snooper+ and start driving.

Power Search

Intuitive finding instead of searching with the function Power Search, all you have to do is enter the most important data (vehicle identification number/engine code).

Power Scan

Type-specific software already during the scanning of the vehicle. The function Power Scan not only queries all systems at the push of a button, it also selects adapted versions for different areas of application, regardless of whether it is for service acceptance, inspection, overall check or the quick scan.

iQ Memory

Our intuitively operated customer database goes without saying. With iQ Memory we offer you a tool for fast customer service and better customer loyalty through transparent diagnosis and centralized management of diagnostic data.

WOW! POWER PACKAGE WSD 300 AND WTI 350

Detailed overview of functions Diagnostics POWER PACKAGE

WSD 300 diagnostic software module (Order no. W015000007)

The updates of the WSD 300 software module always provide the workshop-relevant vehicle protocols - these enable communication with the vehicle to read out error codes.

OBD diagnostics on all systems installed in the vehicle

- Read/erase fault memory incl. description and display
- Display data lists, also graphically
- Actuator test (control of actuators)
- Service Reset
- Fast electronic status report through power scan, normal scan and service scan
- WOW! Highlight functions:
 - Power Repair
- Basic data WOW! own „Further repair information“
 - Power Search
 - Power Scan
 - iQ Memory

EOBD diagnosis on exhaust gas relevant systems

- Read/erase fault memory
- Freeze-frame - Read out data
- Display data lists, also graphically
- Readiness codes (readiness codes)

Active WSD 300 license is required for OEM „Security Gateway“ solutions (FCA, MB), e-vehicle diagnostics and more.

Diagnostic results can be printed quickly as a documentation and aid to argumentation for the customer.

Detailed overview of functions Combi module WTI 350* (Order no. W015 000 350)

Special knowledge for maintenance, inspection and service

- Maintenance plans according to manufacturer specifications
- Timing belts and V-ribbed belts
- Tyre pressures, wheel adjustment data etc.
- Filling quantities, tightening torques, lubricants etc.
- Pollen filter info (location, exchange, etc.)
- Service provisions

Ready for engine, ABS, brake and much more

- Engine management, component testing and component description
- Circuit diagrams of engine, airbag and air conditioning
- Pin assignments / input and output measured values
- Fuel system information
- Manuals for air conditioning, airbag system and ABS
- Troubleshooting tables, tips and tricks

Everything under control - especially comfort systems

- Circuit diagrams for lighting, comfort systems, central locking, charging systems and much more
- Tyre pressure monitoring systems (RDKS)
- Electronic parking brake
- Indicator lights, information and warning systems

WOW! POWER PACKAGE WSD 300 AND WTI 350

Overview WOW! Software Licenses *
