

# PRODUCT INFORMATION

## WOW! FLUSHING KIT

### Highlights Flushing kit

**The flushing kit enables the flushing of the refrigerant circuit for air conditioning systems with refrigerant R-1234yf and R134a.**

# WOW! FLUSHING KIT

## WOW! COOLIUS series – fully automatic A/C service

### WOW! Flushing kit (Art. no. W067100010) consisting of:

- Flush/flushing kit
- Adapter for different refrigerants
- Adapter for different threaded connections
- Micro-Filter

## Features

### Easy handling - fast application

- Fully automatic flushing in the circuit with liquid refrigerant against the flow direction of the A/C Systems in car - adapter or adapter kit required (available from the respective vehicle manufacturer)
- Very high flow rate during rinsing and therefore high cleaning performance of the A/C system
- 1 filter that can easily be replaced after 5 cycles

### Flexible for different needs

- Can be used for the refrigerant R134a and the new refrigerant R1234yf
- Can also be used for air conditioners with different threaded connections

### Good for your wallet – good for the environment

- Recycled refrigerant can be reused and does not need to be disposed of.

## Technical data

Type	R134-R1234FK 5L
Refrigerant tank	~ 5000ml
Refrigerant	R134a und R1234yf
Max. operating pressure	20 bar
Number of filters	1
Max. ambient temperature	50 °C

### Have you also thought about materials and accessories such as refrigerants, oils, UV leak detection additive or UV LED flashlight?

You can find these and other products for the comprehensive air conditioning service on the respective Würth websites or directly from your responsible salesperson.

Illustrations partly include options and additional equipment. Errors and changes reserved.

# WOW! FLUSHING KIT – ACCESSORIES

## WOW! ADAPTERSETS –FITTING FLUSHING

- **Replacement of the compressor** requires flushing of the entire vehicle air conditioning system and the replacement of oil.
- **Flushing the air conditioning system** with refrigerants is necessary to remove oil and contaminants from the air conditioning system.
- **The compressors cannot be flushed and must be removed!**
- **High and low pressure connections of the compressor must be bridged by adapters** to flush the entire vehicle air conditioning circuit.

### GENERAL NOTE ON THE FLUSHING PROCESS:

The adapter sets are only for bridging the compressor connections. After a flushing operation of the air-conditioning system, the filter drier and expansion valve must always be replaced. During flushing, the old components that will have to be replaced later can be used as a stopgap and then disposed of.

## Eigenschaften

**By using the WOW! adapter sets the flushing of air conditioning systems with WOW! COOLIUS becomes even easier.**

- **Wide range of adapter sets** for bridging compressor connections and to connect to the flushing kit, which is necessary for flushing the system.
- **Large coverage of different vehicle types**, all sets for the different vehicle models can be found in a detailed overview list.
- The respective set includes the adapters for the different compressor types.
- Can also be used with air conditioners with different threaded connections.

### Please note:

**The respective sets are optionally available and are not included in the purchase of a rinsing kit. All adapter sets can be found in the detailed product overview list on the WOW! website.**
