

25.09.2024:

FIXING WIBU ERROR MESSAGE IN WOW! SOFTWARE

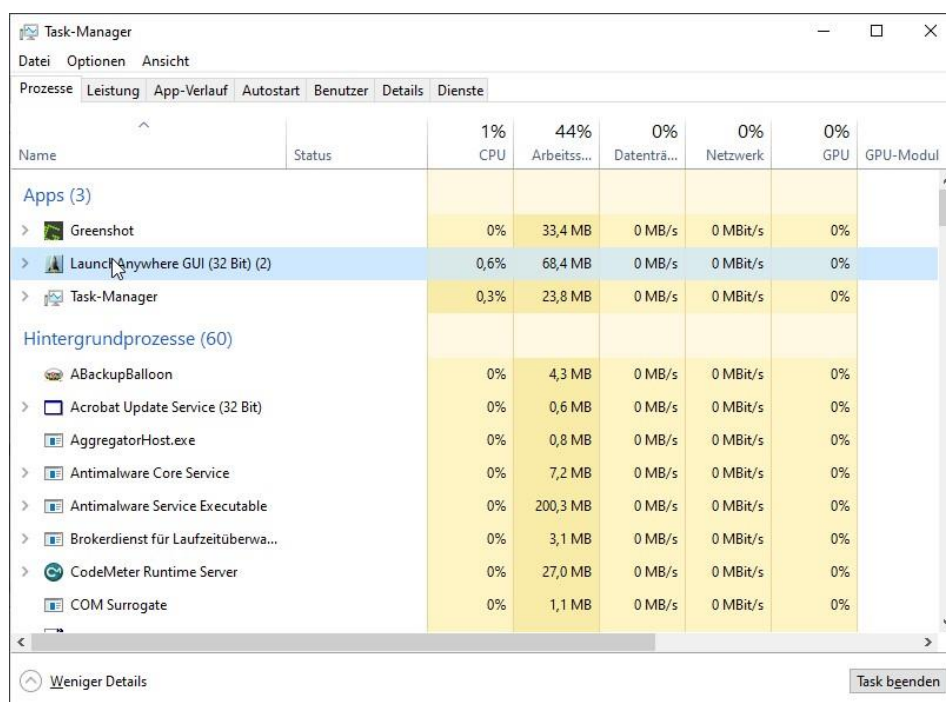

Currently, the following error message appears when starting the WOW! software:

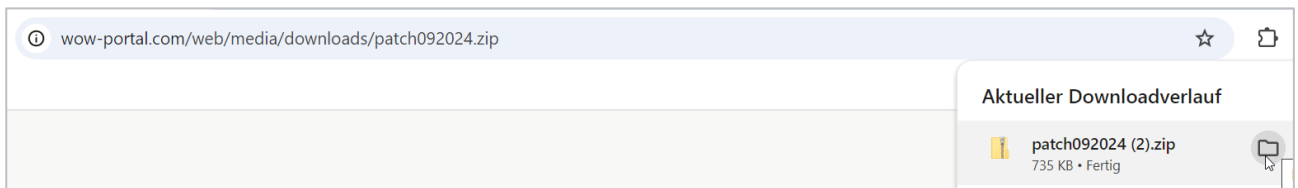

Please follow these steps to resolve the WIBU error message:

- Please restart your computer on which the WOW! software is installed.
- **Do not start** the WOW! software after the restart.

If the WOW! Software starts automatically, close it via the Task Manager. To do this, press CTRL ALT DEL at the same time and then select "Task Manager". In the Task Manager, select the line with "LaunchAnywhere" and click on "End task".

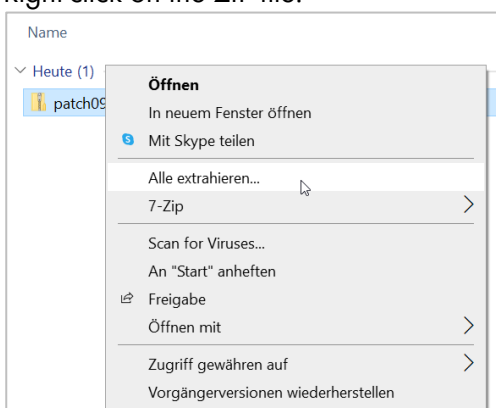

- Download the following file to your computer:
<http://www.wow-portal.com/web/media/downloads/patch092024.zip>

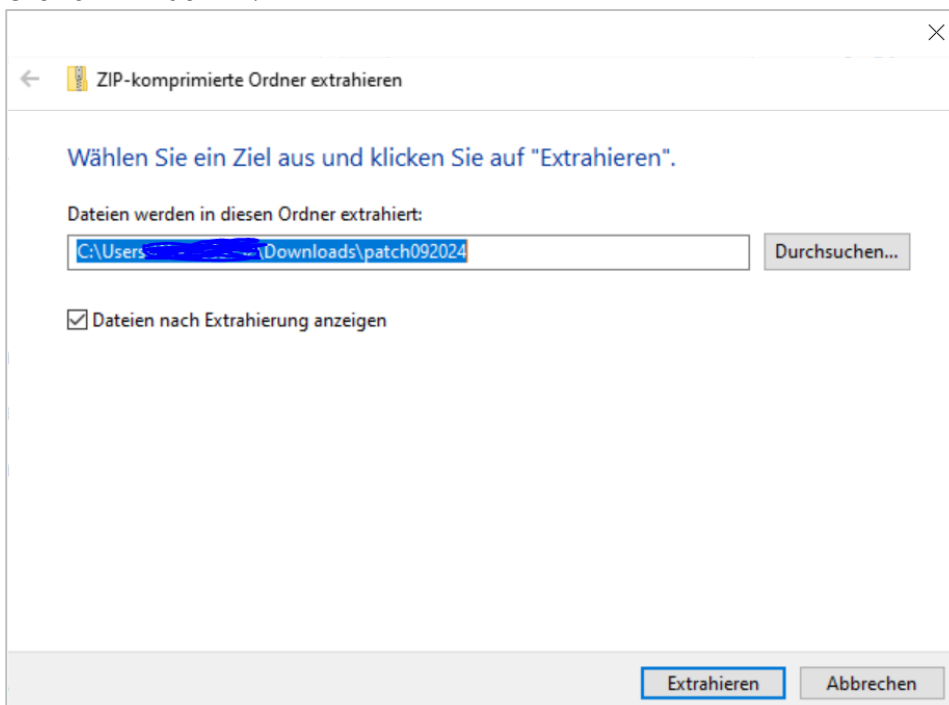

After downloading the ZIP file, for example to the "Downloads" folder, please proceed as follows:

1. Right-click on the ZIP file.

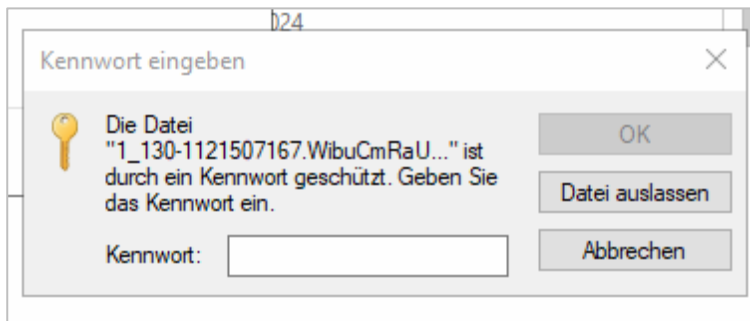

2. Click on "Extract All".

3. Set the path by clicking "Browse" - select "Desktop" as the storage location, click on "Select Folder" and then click "Extract".

4. Enter the password "wow" and click "OK".

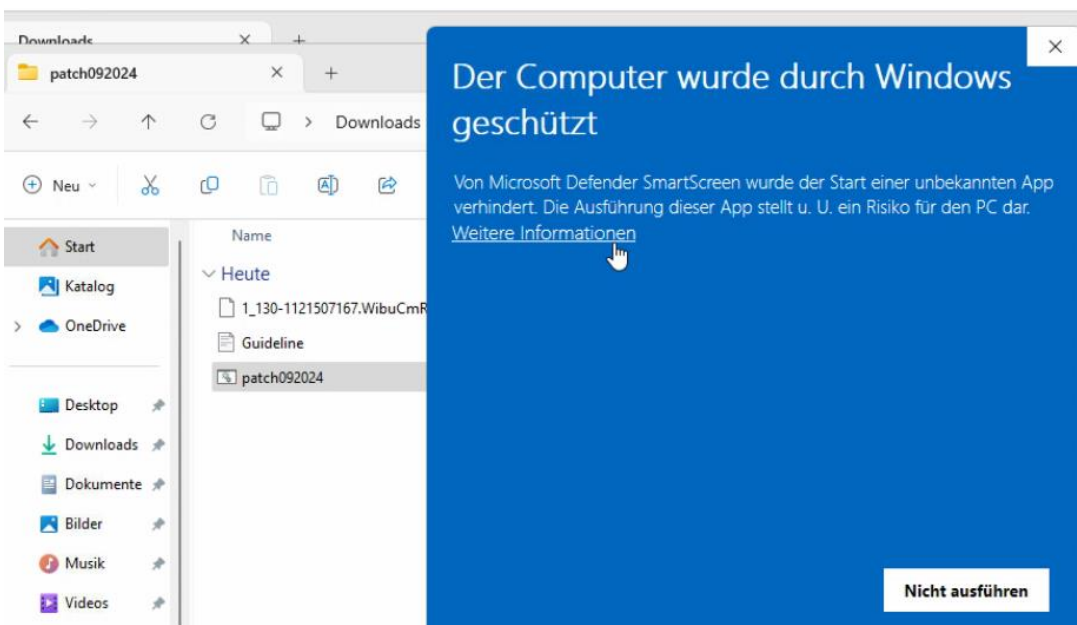

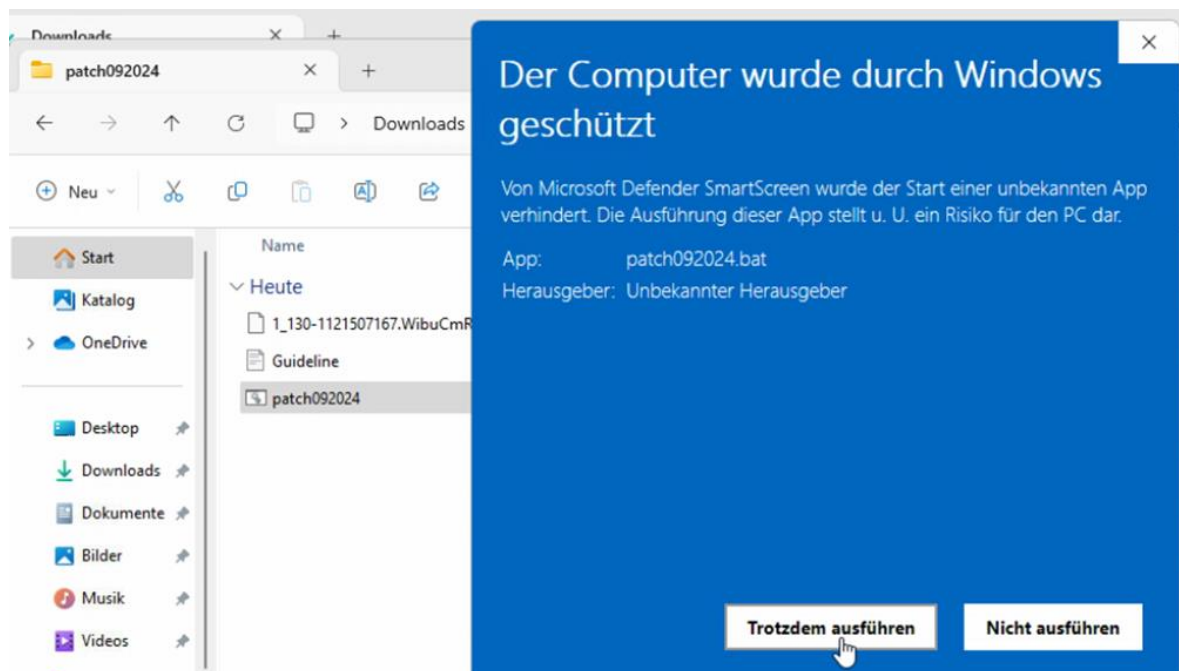

5. Open the file "patch092024" or "patch092024.bat" by double-clicking.

Name	Änderungsdatum	Typ	Größe
1_130-1121507167.WibuCmRaU	23.09.2024 11:15	WIBUCMRAU-Datei	1.024 KB
Guideline	23.09.2024 12:05	Office Open XML-...	24 KB
patch092024	23.09.2024 11:20	Windows-Batchda...	2 KB

6. The file opens, installs and closes automatically.

If a Windows pop-up appears with the message "Windows protected your PC", please click on "More info" and then confirm with "Run anyway".

7. Start the WOW! software by double-clicking. If necessary, perform the online update.
8. You can now work as usual.
